Volume 54, Number 1 January-February, 1985

	Engl.	Russ.
Study of Glucose-6-Phosphate Transport in Some Extreme Halophilic Cultures — L. O. Severina, N. V. Pimenov, and V. K. Plakunov	1	5
Coupling of Organotrophic and Lithotrophic Metabolism in Methane-Utilizing Bacteria — V. A. Romanovskaya, I. G. Sokolov, and Yu. R. Malashenko	7	11
Production of Extracellular Higher Fatty Acids by Yeast Growing on Hexadecane — T. N. Medvedeva, R. N. Matyashova, G. V. Lenskikh, and I. B. Romanova	12	17
Age Structure of a Population of the Yeast Candida boidinii Utilizing Methanol — V. N. Ivanov and S. A. Sedina	16	22
Cleavage of the Siloxane Bond in Quartz by Bacillus mucilaginosus — N. P. Belkanova, G. I. Karavaiko, and Z. A. Avakyan	20	27
Photoinhibition of Luminescence of Phosphorescent Bacteria — V. V. Zavoruev, E. S. Vysotskii, and V. V. Mezhevikin	23	31
Nitrogenase Activity in the Green Bacterium Chlorobium limicola — O. I. Keppen, N. V. Lebedeva, S. A. Petukhov, and Yu. V. Rodionov	28	36
Search among Actinomycetes for Producers of Phospholipase C Inhibitors — E. P. Yakovleva, Zh. D. Levit, E. D. Kuz'mina, T. I. Rozhanskaya, T. V. Andreeva, and L. I. Fateeva	33	42
Influence of the Carbon Sources on the Synthesis of Extracellular Invertase, Protein, Pigment, and Biomass by Aureobasidium pullulans — E. R. Aleksanyan and L. S. Markosyan	38	49
Influence of Vitamins and Certain Amino Acids on the Biosynthesis of Glucose Isomerase by a Culture of Streptomyces albogriseolus — A. V. Gavristov, V. P. Afanas'eva, E. A. Zhitskaya, N. S. Golovina, and L. A. Nakhapetyan	42	53
Proteolytic Properties of the Fungus Emericellopsis glabra — G. I. Izvekova	49	62
Survival Rates of Yeast Organisms after Dehydration as Determined by Fluorescence Microscopy — A. I. Rapoport and M. N. Meysel'	53	66
Cytology of Cells of Different Strains of Bacillus diastaticus — V. P. Murygina, N. A. Kostrikina, and V. I. Biryuzova	55	69
Features of the Organization and Chemical Composition of the Cell Wall of Bacillus brevis, a Producer of Gramicidin S — I. M. Simakova, E. F. Kharat'yan, G. N. Vostroknutova, V. G. Bulgakova, T. P. Udalova, and D. N. Ostrovskii	60	73
A New Chromium-Reducing, Gram-Variable Bacterium with Mixed Type of Flagellation — E. I. Kvasnikov, V. V. Stepanyuk, T. M. Klyushnikova, N. S. Serpokrylov, G. A. Simonova, T. P. Kasatkina, and L. P. Panchenko	69	83
Effect of Kerogen Oxidation Products on Growth and Luminescence in Photobacterium fischeri — I. P. Dzhunkovskaya, V. I. Sukharevich, V. E. Shkinke, and Z. A. Viesture	75	89
Culturing a Halophilic Methane-Forming Coccus on Monomethylamine — T. N. Zhilina and V. V. Kevbrin	79	93
Variation in Specific Growth Rate of Candida diddenzii with Various Methods of Cultivation — A. N. Shkidchenko and B. I. Tsvetkova	85	100
Survival of Oligotrophic Prosthecate Bacteria under the Effects of Extreme Environmental Factors — A. A. Imshenetskii, B. G. Murzakov, M. D. Evdokimova, I. K. Dorofeeva, L. V. Vasil'eva, and A. M. Semenov	88	104
Clarification of the Factors Stimulating the Production of Cobalamin in Achromobacter cobalamini — B. I. Shteinberg and N. M. Datsyuk	92	108
Incorporation of Some Purine and Pyrimidine Precursors into Nucleic Acids of the Blue-Green Alga Anabaena variabilis — N. P. Kulyba and A. V. Kozlov	97	114
Detection of Lipoprotein Complexes in Lipid Fractions of Proteus mirabilis — B. N. Bondarenko	103	121
Pathways of the Catabolism of Aromatic Substrates in Rhodococci — I. N. Dugan and E. L. Golovlev	109	128

Peculiarities of the Oxidation of α-Methylstyrene by Bacteria of the Genus Pseudomonas – D. B. Dzhusupova, B. P. Baskunov, L. A. Golovleva, R. M. Alieva, and A. N. Ilyaletdinov 115 136
Effect of Aeration on Zymomonas mobilis Metabolism – L. M. Pankova, Yu. E. Shvinka, M. E. Beker, and E. E. Slava 120 141
Kinetics of Formaldehyde Biodegradation – V. E. Leonova, A. V. Abramov, and V. F. Karpukhin 124 146
Effect of Algal Biofertilizers with Nitrogen Levels on Yield of Rice – S. G. Sawashe, S. W. Jadhav, and P. L. Patil 129 152
Survival Time of Microorganisms in Permanently Frozen Sedimentary Rocks and Buried Soils – D. G. Zvyagintsev, D. A. Gilichenskii, S. A. Blagodamskii, E. A. Vorob'eva, G. M. Khlebnikova, A. A. Arkhangelov, and N. N. Kudryavtseva. . . 131 155

Volume 54, Number 2 March-April, 1985

Content of Amino Acids and Mineral Elements and Activity of Some Enzymes in Germinating *Bacillus thuriqiensis* Spores – A. N. Alekseev, L. N. Karabanova, O. A. Krainova, E. S. Krasov, E. V. Kashparova, A. I. Bakhtuev, and V. V. Shevtsov. 137 181
Chemical Nature of the Autoregulatory Factor d_1 of *Pseudomonas carboxydoflava* – G. A. Osipov, G. I. El'-Registan, V. A. Svetlichnyi, A. N. Kozlova, V. I. Duda, A. S. Kaprel'yants, and V. V. Pomazanov 142 186
Biotin Transport in the Yeast *Trichosporon cutaneum* – E. A. Altukhova and L. I. Vorob'eva 146 191
A Study of the Ability of Extreme Halophils to Transport Glucose – L. O. Severina, N. V. Pimenov, and V. K. Plakunov 152 197
Utilization of 3-Chlorobenzoic Acid by a *Acinetobacter calcoaceticus* – G. M. Zaitsev and B. P. Baskunov. 158 203
Partial Reconstitution of Luminescent System of Phosphorescent Bacteria *in vitro* – V. V. Mezhevikin, E. S. Vysotskii, V. V. Zavoruev, P. V. Kuznetsov, and A. A. Raibekas 164 209
Influence of Culturing Conditions on Organization of Membrane Apparatus and Surface Tubular Structures of *Methylocystis echinoides* Cells – N. E. Suzina, E. V. Chemina, Yu. A. Trotsenko, and B. A. Fikhte. 169 214
A Study of the Role of Additional Substrates in DDT Degradation by a Culture of *Pseudomonas aeruginosa* – O. V. Mal'tseva and L. A. Golovleva 177 222
Stability and Dynamics of R-Plasmids in *Escherichia coli* Populations under Conditions of Continuous Culturing – A. E. Filonov, I. N. Rublevskaya, and A. M. Boronin. 182 227
Variability of *Pullularia pullulans* Cultures with Different Ploidy Levels – A. A. Imshenetskii, T. F. Kondrat'eva, and N. A. Lobacheva 187 233
Additions to the Genotaxonomy of Yeasts from the Genera *Williopsis* and *Zygowilliopsis* – G. I. Naumov, M. M. Vustin, I. P. Bab'eva, and I. S. Reshetova 192 239
Limitation of Growth and Gramicidin S Biosynthesis by *Bacillus brevis* var. G.-B. – V. P. Lykov, I. V. Bodnar, M. L. Khovrychev, A. N. Polin, A. S. Fokht, and I. L. Rabotnova 198 245
Influence of Acetate on the Growth of *Escherichia coli* under Aerobic and Anaerobic Conditions – G. V. Smirnova and O. N. Oktyabr'skii. . . . 205 252
Kinetic Principles of the Growth of *Methanosarcina vacuolata* on Methanol – S. V. Kalyuzhnyi, A. N. Nozhevnikova, and S. D. Varfolomeev 209 257
Density and Age of Cells of a Population of the Methane-Assimilating Yeast *Candida boidinii* – V. N. Ivanov and S. A. Sedina. 216 263
Peculiarities of a Chemostat Culture of the Methane-Assimilating Yeast *Hansenula polymorpha* – M. V. Baev, E. É. Sterkin, and Yu. G. Kapul'tsevich. 222 270
Combined Cultivation of *Trichoderma longibrachiatum* and *Endomycopsis fibuligera* – A. V. Gavristov, E. A. Zhitskaya, and A. B. Churakova 226 274
Some Characteristics of the Kinetics of Growth and Synthesis of Exohydrolases in *Aspergillus foetidus* and *Zigofabospora marxiana* – N. I. Astapovich, V. N. Ermolitskii, A. G. Lobanok, and V. V. Lebedev 231 280

Myxotrophic Growth of *Rhodococcus minimus* in a Batch Culture — L. M. Baryshnikova, N. V. Eroshina, N. M. Myasoedova, N. G. Termkhitarova, and E. L. Golovlev 234 284
Features of the Antigenic Structure of Rhodococci Cultured on Different Media — I. B. Ivshina, R. A. Pshenichnov, and N. N. Kevorkov. 240 290
Dynamics of Microbiological Processes with Additional Aeration of the Oil Sratum — M. V. Ivanov, S. S. Belyaev, K. S. Laurinavichus, A. Ya. Obraztsova, S. N. Gorlatov, and V. A. Bondar'. 243 293
Silicon Compounds in Solution during Bacterial Quartz Degradation — Z. A. Avakyan, N. P. Belkanova, G. I. Karavaiko, and V. P. Piskunov. 250 301
Actinomycetes Producing Trypsin Inhibitors — A. M. Bezborodov, I. V. Ulezlo, M. V. Shul'gina, N. A. Kuropatkina, A. N. Polin, and K. A. Vinogradova. 257 308
Effect of Actinomycetes on Survival of Nodule Bacteria in the Soil — L. M. Polyanskaya 262 314
Zonal Character of Incidence of Staphylolytic Microorganisms in River Water — V. A. Lambina, N. A. Chuvil'skaya, L. G. Churkina, and L. A. Ledova. 266 318

Volume 54, Number 3 May-June, 1985

Assimilation of Carbon in the Growth of Methylococcus capsulatus on a Mixture of Methane with Propane — A. G. Zhivotchenko, E. G. Davidova, and A. N. Grigoryan 269 341
Growth of the Purple Sulfur Bacterium Ectothiorhodospira shaposhnikovii on Bicarbonate Enriched with the Isotope ^{13}C — M. V. Ivanov, G. I. Gogotova, M. B. Vainshtein, A. M. Zyakun, and V. A. Bondar' 274 347
Metschnikowia lunata: A Model for Investigation of Dimorphism — V. I. Golubev and I. V. Golubeva 278 352
Preparatory Metabolism of 4-Chlorobenzoic and 2,4-Dichlorobenzoic Acids in Corynebacterium sepedonicum — G. M. Zaitsev and Yu. N. Karasevich 282 356
Mutagenic Action of Acenaphthene on Haploid and Diploid Cultures of Candida scottii — A. A. Imshenetskii, T. F. Kondrat'eva, and M. A. Lin'kova 286 360
Properties of a Facultative Methylotroph Identified as Protaminobacter ruber — N. V. Doronina, N. I. Govorukhina, and Yu. A. Trotsenko 289 363
Potential Rate of Methanol Utilization by a Chemostat Culture of Hansenula polymorpha Yeasts — T. V. Baev, V. É. Sterkin, and Yu. G. Kapul'tsevich 295 370
Changes in the Stationary State of a Chemostat Yeast Culture — M. B. Shekhtman 299 375
Oxidation of Hexadecane in a Porous System with Formation of Fatty Acids — E. S. Kulik, Yu. P. Somov, and E. P. Rozanova 304 381
Peculiarities of the Transport of Aromatic Amino Acids in Extremely Halophilic Microorganisms — V. K. Plakunov and L. B. Lobyreva 308 386
Study of the Physiology of Growth and Oversynthesis of Escherichia coli DNA Polymerase during Two-Stage Continuous Culturing — A. N. Shkidchenko, S. A. Soktoev, L. V. Gurina, and E. L. Golovlev 314 392
Influence of Certain Inhibitors on the Viability of Protein and Nucleic Acid Synthesis in Escherchia coli — S. S. Avtushenko and L. F. Smirnova 319 398
Yeast-Lytic Activity of the Culture Fluid of Bacillus brevis — T. S. Kalebina, S. A. Ermakova, and I. S. Kulaev 323 402
Relationship between the Content of High-Molecular-Weight Polyphosphates and Trehalose and Viability of Populations Following Dehydration of the Yeast Saccharomyces cerevisiae — P. B. Zikmanis, M. G. Laivenieks, L. P. Auzinya, I. S. Kulaev, and M. E. Beker 326 406
Dependence of Degree of Antibacteral and Antiphase Effect of Ozone on Concentration of Cells and Phage Particles in the Nutritive Medium — N. V. Grits and A. Yu. Fomichev 330 410
Reaction of the Microbe System of Soils to a Heavy-Metal Concentration Gradient — V. S. Guzev, S. V. Levin, and D. G. Zvyagintsev 333 414
Composition and Properties of the Outer Layer of the Cell Wall in Bacillus brevis — Producer of Gramicidin S — I. M. Simakova, E. F. Kharat'yan, G. N. Vostroknutova, V. G. Bulgakova, T. P. Udalova, and D. N. Ostrovskii. 339 421
Rapid Method for Determining Diomass of Thiobacillus ferrooxidans and Its Oxidative Activity during Leaching of Sulfide Concentrates — T. O. Skanun, S. I. Pol'kin, V. V. Panin, É. V. Adamov, G. I. Karavaiko, and N. G. Koreshkov 346 429

Taxonomic Study of Pseudomonas aurantiaca and a Proposed Neotypic Strain of this Species – E. A. Kiprianova, G. F. Levanova, E. V. Novova, V. V. Smirnov, A. D. Garagulya, and O. I. Boiko 350 434
Genetic Systematics of Yeasts Hansenula anomala and Hansenula subpelliculosa – G. I. Naumov and M. N. Shurov 355 441
Storage of Dried Mixed Culture of Propionic and Acidophilic Bacteria at Different Temperatures – É. K. Karasevich, A. V. Platonov, N. T. Volkova, and L. I. Zemkina 359 446
Changes in the Surface Charge of Yeast Cells during Their Dehydration and Rehydration – A. I. Rapoport and M. E. Beker 362 450
Heterogeneity of a Population of the Methanol-Assimilating Yeast Candida biodini with Respect to Physiological Properties of the Cells – V. N. Ivanov and S. A. Sedina 365 454
Testing for Activity of Nodule Bacteria in Terms of Poly-β-Hydroxybutyrate Accumulation Following Vital Staining of the Colonies with Phosphine 3R – G. A. Bonartseva 371 461
Transformation of Nitrogen in Soddy-Podzolic Soil as a Result of the Development of Pseudomonas fluorescens var. denitrificans – T. K. Il'ina, and V. V. Negru-Vode 375 465
Determination of Exogenous Hydrogen for Assessment of Symbiotic Nitrogen-Fixation Activity by the Acetylene Method – B. F. Sadykov, L. D. Zueva, and A. U. Kappushev 381 472
Nitrogen-Fixing Bacteria Assimilating Monocarbon Compounds in Soils under Rice – I. K. Chistyakova 384 476
Symbiotic Nitrogen Fixation in Cultivated Podzolic Soils of the Kola Penninsula – V. I. Egorov 388 480
Correlation of Molecular Nitrogen Fixation with Photosynthesis of Phytoplankton and Certain Ecological Factors in the Rybinsk Reservoir – V. Ya. Kostyaev, N. M. Mineeva, S. M. Razgulin, and M. M. Smetanin 391 484
Thermophilic Cyanobacteria from a Cyanobacterial Community – S. S. Bil'dushkinov and L. M. Gerasimenko 397 490

Volume 54, Number 4 July-August, 1985

Role of Phototrophic Microorganisms in the Gas Exchange of a Thermophilic Cyanobacterial Cenosis – S. S. Bil'dushkinov, V. K. Nekrasova, and L. M. Gerasimenko. 401 517
Differentiation of the Fungus *Acremonium chrysogenum* and Synthesis of Serine Proteases – Yu. É. Bartoshevich, S. B. Dmitrieva, I. N. Krest'yanova, and L. I. Vasil'eva. 407 523
Some Characteristics of Growth and Biosynthetic Activity of a Mixed Microbial Culture – N. S. Landau, I. I. Milovanova, and N. S. Egorov . 412 529
Isolation of *Clostridium thermoautotrophicum*, an Anaerobic Methylotrophic Spore-Forming Organism – S. A. Ilarionov 416 533
Properties of a New *Hyphomicrobium vulgare* Strain – N. V. Doronina. 421 538
The Presence of Teichoic Acids in Strains from the Genus *Actinomadura* – N. V. Potekhina, L. P. Terekhova, T. P. Preobrazhenskaya, and I. B. Naumova 426 545
Changes in Composition of Cell Wall and Cell Phospholipids in the Process of Cytodifferentiation of *Absidia coerulea* – E. P. Feofilova and I. V. Pisarevskaya 430 549
Microbiological Formation of Methane from Hexadecane – E. P. Rozanova, T. N. Nazina, E. S. Kulik, and Yu. P. Somov. 435 555
Variability of the Physiological Characteristics of Microorganisms – G. N. Fishtein 439 560
Effect of Non-Ionic Surfactants on Sulfate Reduction – R. Kh. Khazipov and I. B. Rezyapova. 442 563
Physiological Activity of *Escherichia coli* Cells Studied by the Method of Spin Exchange – N. V. Nikitin, B. P. Nikolaev, L. N. Petrov, and D. K. Toropov 446 566
Determination of the Activity of Carboxylating Enzymes in Cells of *Candida lipolytica* during Growth of Glucose and Hexadecane – I. T. Ermakova. . 452 572
Electron-Microscopic Determination of Total Dehydrogenase Activity in Cells of the Cyanobacterium *Chlorogloeopsis fritschii* – L. A. Mineeva, I. O. Selyakh, E. D. Makar'eva, O. I. Baulina, and M. V. Gusev 457 577
Hydrogenase Activity of *Brevibacterium flavum* – I. G. Kornilova and Yu. É. Shvinka 463 582

Effects of Phenobarbital on Bacterial Luciferase of *Photobacterium fischeri* — V. S. Danilov 468 587
Enzymes Participating in the Carbon Metabolism in the Purple Sulfur Bacterium *Lamprobacter modestohalophilus* — E. N. Krasil'nikova 472 592
Influence of Growth Rate and Nature of the Limiting Substrate on Composition of Biomass of *Hansenula polymorpha* — L. P. Dudina, É. G. Dedyukhina, and V. K. Eroshin. 475 595
A Comparative Evaluation of the Growth of the Methanol-Assimilating Yeast *Hansenula polymorpha* Using Different Continuous-Culturing Methods — V. É. Sterkin, M. V. Baev, A. V. Glazunov, and Yu. G. Kapul'tsevich. . 478 599
Kinetics of the Growth and Development of *Bacillus thuringiensis* during Batch Culturing — Z. V. Sakharova, Yu. N. Ignatenko, F. Shchul'ts, M. P. Khovrychev, and I. L. Rabotnova. 483 604
Stability of Naphthalene Biodegradation Plasmids NPL-1 and NPL-41 in Populations of *Pseudomonas putida* under Conditions of Continuous Culture — A. M. Boronin, A. E. Filonov, V. V. Balakshina, and A. N. Kulakova 489 610
Electro-Optical Determination of the Number of Undamaged Bacterial Cells after Extreme Influences — V. N. Brezgunov, V. N. Shvets, V. D. Bunin, A. G. Boloshin, D. E. Svetogorov, and A. N. Shchepkina 494 616
Effects of Various Types of Gramicidin S Derivatives on Bacterial Cells and Protoplasts — V. G. Bulgakova, Z. M. Petrykina, P. N. Korolev, S. Yu. Sazykina, and A. N. Polin 499 621
Ultrastructural Changes in Cells of *Mycobacterium rubrum* under the Influence of Sulfochlorantine — M. N. Poglazova, N. M. Verbina, and R. N. Nikitina 505 628
Mutant of the Methanol-Assimilating Yeast *Pichia pinus* Partially Resistant to Catabolite Repression — T. O. Alamyaé, Kh. Kh. Téugyas, Ya. O. Soom, and Ya. A. Simisker. 512 634
Some Physicochemical Properties of the Temperate Phage DNA and Its Possible Effect on the Variability of *Mycobacterium lacticolum* — N. A. Obukhova, A. A. Kolesnikov, D. A. Maslov, L. A. Rezepkina, and E. S. Mil'ko 518 641
A Rapid Method for Selecting Mutants of *Pullularia pullulans* with High Pullulan-Synthesizing Activity — A. A. Imshenetskii, T. F. Kondrat'eva, and N. M. Dul'tseva. 523 647
Effectiveness of Mutants of Clover Nodule Bacteria Obtained under the Influence of Repeated Ultraviolet Irradiation — É. B. Lapinskas. . . 526 651
The Nitrogen Cycle in Virgin and Cultivated Soils — B. F. Sadykov, L. D. Zueva, and V. I. Shlykov 531 656
Fluorescence Intensity of Strains of Nodule Bacteria (*Rhizobium meliloti* and *Rhizobium phaseoli*) Differing in Activity, Grown in the Presence of the Lipophilic Vital Stain Phosphine 3R — G. A. Bonartseva and V. L. Myshkina 535 661
The Role of Yeasts of the Genus *Candida* in Transforming the Energy of Hydrocarbons in Oil-Polluted Gray-Brown Soil — N. M. Ismailov 542 668
Kinetics of Fe^{2+} Oxidation by *Thiobacillus ferrooxidans* in Solutions Produced by Bacterial Leaching of Arsenic-Containing Concentrates — N. G. Koreshkov, V. V. Panin, T. O. Skakun, G. I. Karavaiko, É. V. Adamov, and S. I. Pol'kin. 547 675

Volume 54, Number 5 September-October, 1985

Gas Exchange of the Thermophilic Acidophilic Phototrophic Organism Cyanidium caldarium — L. M. Gerasimenko and Yu. M. Miller 551 693
Regulation of Alkaloid Biosynthesis in Penicillium roqueforti by Tryptophan and Its Analogs — T. A. Reshetilova and A. G. Kozlovskii 556 699
11 β-Hydroxylation of Steroids by Cunninghamella and Curvularia — B. A. Angelova, G. V. G. V. Sukhodol'skaya, and K. A. Koshcheenko 559 704
Nitrogen-Fixing Ability of Filtrable Reversible Forms of the Marine Spirochete Treponema hyponeustonicum — L. N. Pshenin, T. G. Kameneva, and I. E. Mishustina. . . . 565 711
Biosynthetic Activity of Cultures of Different Actinomadura Species — E. G. Toropova, N. S. Egorov, and N. F. Piskunkova 571 719
Arthroascus schoenii nov. comb., a Yeast-Like Organism — I. P. Bab'eva, M. M. Vustin, G. I. Naumov, and M. E. Vinovarova 575 724
The Protective Effect of Antioxidants on Escherichia coli in the Case of Immobilization of Cells in Polyacrylamide Gel — N. G. Starostina, K. A. Lusta, and B. A. Fikhte 580 730

Activity of the Enzymes of the Tricarboxylic Acid Cycle and the Anaplerotic Pathways in Various Strains of Candida lipolytica Growing on Glucose and Hexadecane – I. T. Ermakova, V. I. Illarionova, O. F. Mel'nikova, N. V. Shishkanova, and T. V. Finogenova 584 735
Influence of the Products of Glucose Metabolism on the Growth of a Recombinant Strain of Escherichia coli: Overproducing DNA Polymerase – S. A. Soktoev, I. N. Dugan, and A. N. Shkidchenko 588 745
Influence of the Culture Conditions on the Activity of NAD(P)H Dehydrogenases of Rhodopseudomonas capsulata – A. G. Agakishiev, A. A. Tsygankov, T. V. Laurinavichene, and I. N. Gogotov 592 745
Induction of the Synthesis of Bacterial Luciferase by Phenobarbital – V. S. Danilov and O. K. Shibilkina 596 750
Regulation of the Synthesis of Key Enzymes of Naphthalene Catabolism in Pseudomonas putida and Pseudomonas fluorescens Carrying Biodegradation Plasmids NAH, pBS3, and NPL-1 – I. N. Starovoitov 600 755
Habitat-Related Fatty-Acid Composition of Lipids in Penicillium – E. P. Feofilova, E. N. Bab'eva, S. S. Abyzov, and E. V. Odintsova 607 763
Possible Ways of Stimulating Exotoxin Synthesis in the Bitoxibacillin-Producing Bacillus thuringiensis – L. I. Abrosimova, A. Ya. Leskova, P. V. Babaeva, and V. V. Shevtsov . . 613 770
Properties of Microbial Cytokinins from Pseudomonas stutzeri – I. V. Mishke, M. K. Teveleva, and É. P. Miklashevichs 616 774
Transport of Glucose and Fructose by Rhodococcus minimum in Batch Culture – L. A. Okorokov, L. M. Baryshnikova, and N. M. Myasoedova 620 778
Effect of Limiting Bacterial Growth with Phosphate on the Development of Cyanide-Resistant Respiration and on Processes of Metabolite Formation – S. M. Trutko, A. G. Medentsev, and V. K. Akimenko 623 782
Oxygen Consumption by Microorganisms of the Genus Pseudomonas When Cultured on Molasses Mash – A. A. Arzamastsev 629 789
The Effect of Levan on the Growth of Gluconobacter oxydans – A. A. Tkachenko 632 792
Changes in Morphology of Soil Bacteria Dependent on Rate of Growth – T. F. Bondarenko, N. S. Panikov, and T. G. Dobrovol'skaya 637 798
Influence of pO_2 on Utilization of Different Carbon Sources for Nitrogen Fixation by the Bacteroids Rhizobium lupini – B. R. Gadzhi-zade, N. G. Fedulova, A. F. Topunov, V. I. Romanov, and V. L. Kremovich 642 804
Monosaccharide Composition of Exopolysaccharides from a Cross-Infecting Group of Rhizobium leguminosarum – T. M. Kovalevskaya, L. V. Kosenko, and I. Ya. Zakharova 647 810
Transient Appearance of Lectin Receptors on Homologous and Heterologous Strains of Rhizobium Capable of Nodulating Pea (Pisum sativum L.) – V. P. S. Chahal and K. S. Vilkhu 651 815
Influence of the Herbicide Prometryn on Symbiotic Nitrogen Fixation and Morphology of Pea Nodules – L. N. Paromenskaya and V. K. Lebskii 655 820
Influence of Carbon Dioxide on the Nitrogen-Fixing Activity of Inoculated Soy and Lucerne Plants – V. L. Myshkina, G. A. Bonartseva, and P. N. Dubrovo 659 822
Study of the Changes in the Electro-Orientation of Escherichia coli Cells in the Presence of Disinfectants – A. Yu. Ivanov, E. Yu. Deinega, A. I. Miroshnikov, and O. S. Savluk 663 826
Effect of Sorption of Yeasts on Their Functional Activity and Composition of Wine Materials – N. M. Ageeva, A. A. Merzhanian, and É. M. Sobolev 666 830
Biodegradation of Oil Hydrocarbons in Soil Inoculated with Yeast – N. M. Ismailov 670 835
Dynamics of the Removal of Cells during Bacterial Hexadecane Oxidation in Media Flowing through Porous Substances – E. S. Kulik, Yu. P. Somov, and E. P. Rozanova . . . 676 842
Influence of Temperature on Prevalence of Phototrophic Bacteria in Hot Springs – V. M. Gorlenko, E. I. Kompantseva, and N. N. Puchkova 681 848

Volume 54, Number 6 November-December, 1985

Influence of Monovalent Cations and Inhibitors on the Transport of C_4-Dicarboxylic Acids in Halophilic Archebacteria – A. L. Tarasov, I. S. Zvyagintseva, and V. K. Plakunov 687 869
Influence of Limitation of the Growth of Bacteria by Carbon, Sulfur, and Iron on the Synthesis of Cytochromes, the Development of Cyanide-Resistant Respiration, and the Oversynthesis of Metabolites – A. G. Medentsev, S. M. Trutko, and V. K. Akimenko 693 876
Effect of Exogenous Tryptophan on Biosynthesis of Ergoalkaloids in Penicillium sizovae – A. G. Kozlovskii, I. G. Vepritskaya, N. B. Gayazova, and V. Ya. Il'chenko 699 883

Effect of Cyclic 3'-5'-Adenosine Monophosphate on the Growth Rate of Escherichia coli — G. A. Mikheeva 704 889
Effect of Inhibiting Sodium Chloride Concentrations on the Growth of Candida tropicalis under Continuous pH-Stat Culturing Conditions — A. V. Furyaeva, M. G. Saubenova, O. M. Puzyrevskaya, U. S. Mukhamedieva, G. I. Tushkova, T. I. Pis'man and N. S. Pechurkin 708 893
Properties of the System Participating in the Transport of Ammonium and Methylamine in Rhodopseudomonas sphaeroides — V. P. Vakulenko and R. N. Ivanovskii 713 899
Transport of Glucose and Kinetics of the Growth of Rhodococcus minimus — L. M. Baryshnikova, R. I. Aminov, L. A. Okorokov, and E. L. Golovlev 719 905
Microbiological Degradation of Phenol Determined by Extrachromosomal DNA — V. I. Korzhenevich and G. M. Shub 723 910
Catabolism of Biphenyl and Pseudomonas putida Strain BS 893 Containing Biodegradation Plasmid pBS241 — I. I. Starovoitov, S. A. Selifonov, M. Yu. Nefedova, and V. M. Adanin 726 914
Isolation and Characterization of Flavinogenic Strains of Pichia quilliermondii Carrying the Regulatory Mutation rib80 (ribR) — G. M. Shavlovskii, D. V. Fedorovich, E. M. Logvinenko, and L. V. Koltun 731 919
Activity of Pullulan Synthesis by Diploid Culture of Pullularia pullulans on Media with Different Carbon Sources — A. A. Imshenetskii, T. F. Kondram'eva, E. A. Dvadtsamova, and N. N. Vorontsova 737 927
Formation of Heterokaryons by Morphological Mutants of the Imperfect Fungus Trichothecium roseum — E. M. Ryazanova, Ya. V. Flyakh, and V. V. Sukhodolets 740 930
Electron-Cytochemical Study of Extracellular Components of Yeast Schwanniomyces occidentalis during Growth on Glucose and n-Alkanes — V. V. Dmitriev, A. B. Tsiomenko, N. V. Feoktistova, and B. A. Fikhte 744 935
Possible Participation of Catalase in the Oxidation of Ethanol by a Respiration Mutant of Candida valida — S. S. Eremina 748 940
Oxidation of n-Alkanes by a Strain of Pseudomonas aeruginosa Carrying Plasmid pBS251 — A. L. Andreeva, A. P. Il'chenko, and A. M. Boronin 752 944
Chlorinated Anilines, a Source of Carbon, Nitrogen, and Energy for Pseudomonas diminuta — É. G. Surovtseva, V. S. Ivoilov, Yu. N. Karasevich, and G. K. Vacil'eva 756 948
The Detection of a Phycourobilin-Containing Phycoerythrin in the Cyanobacterium Oscillatoria princeps Vauch. — I. N. Stadnichuk, N. I. Romanova, and I. O. Selyakh 760 953
Hydrogen Oxidation by Immobilized Renobacter vacuolatum Cells — D. I. Nikitin and O. I. Slabova 766 960
Catabolite Repression of Exoprotease Synthesis in Bacillus thuringiensis and Dependence of This Effect on Zinc — N. S. Egorov, Zh. K. Loriya, and T. G. Yudina 769 964
Intracellular Distribution of Cobalt in the Yeast Candida maltosa — A. P. Belov, E. G. Davidova, and V. B. Rachinskii 773 970
New Halophilic Purple Bacteria Rhodobacter euryhalinus sp. nov. — E. I. Kompantseva 777 974
Morphology and Ultrastructure of Certain Nocardiopsis Species — L. N. Lavrova, O. N. Kapitonova, T. P. Preobrazhenskaya, L. N. Kats, and L. P. Terekhova 784 983
Ultrastructure of L-Lysine-Producing Cells of Corynebacterium glutamicum — L. A. Tikhomirova, O. V. Salamakha, N. P. Rogatykh, V. G. Yasinovskii, and T. N. Zubarev 791 990
Effect of Temperature on Growth of Mycelial Fungi Colonies — A. A. Malama, S. N. Mironova, T. V. Filimonova, Yu. V. Moiseev, and K. Z. Gumargalieva 795 994
Effect of an Oxidizable Substrate on the Motility of Gluconobacter oxydans Cells — G. V. Pavlenko and B. V. Gromov 799 998
Nitrogen-Fixing Activity and Effectiveness of Spirilla Dwelling on Plant Roots — O. A. Berestetskii, L. F. Vasyuk, T. A. Élisashvili, and A. V. Plyushch 803 1002
Effect of Bacteria of the Genus Spirillum on Symbiosis of Different Varieties of Soybean with Rhizobium japonicum — G. A. Bonartseva and V. L. Myshkina 808 1008
Isolation and Preservation of Acid-Resistant Yeast Strains — E. A. Andreeva, O. P. Blinova, and I. L. Rabotnova 811 1011
